ABSTRACT

This Project is aimed at developing a Tourism_website of India. It is a window based application that can be accessed throughout the globe. The system will reduce the work load, saves the valuable time and would make the system generalised.

Tourism websites are commonly used in all countries. The project entitled Tourism India is a software for various tourists who come from various countries. It mainly focus on pilgrimages, hill stations etc. It tells about the places to be visited. The website employs intuitive navigation, captivating visuals, and concise textual descriptions to engage users. Though a user-friendly interface, it aims to inspire travel enthusiasts by highlighting the unique features and experiences each location.

Objectives of Mini Project: (What you want to develop your mini project aims)

Obj1: The goal is to create a system that allows users to conduct all travel and sightseeing activities.

Obj2: To identify, manage and design strategies and management plans for tourist areas and destinations based on sustainability principles.

Tools Required:

Software: Content Delivery Network, Social Media Integration tools.

Rules:

An abstract summarizes, usually in one paragraph of 300 words or less, the major aspects of the entire paper in a prescribed sequence that includes: 1) the overall purpose of the study and the research problem(s) you investigated; 2) the basic design of the study; 3) major findings or trends found as a result of your analysis; and, 4) a brief summary of your interpretations and conclusions.

Font: Times New Roman, 12 size

Line spacing: Before 6 pt, After 6 pt, Line spacing 1.5 lines.
